MAP OF NEW YORK STATE 25

1984 IN NEW YORK STATE

New York's economy registered broad-based improvement in 1984, as most economic sectors recorded healthy upturns and moved to new peak activity levels. Nevertheless, some lingering effects of the severe recession of 1981-82 were still apparent.

The job picture was positive, with nonagricultural employment consistently reaching new monthly highs and averaging a 3.3-percent gain for the year. Unemployment was down substantially to 7.2 percent, a 1.4-percentage point dip from a year earlier; this was below the U.S. rate of 7.5 percent.

Established growth patterns among the regions continued, as the Poughkeepsie, Nassau-Suffolk and Orange County areas outpaced the advances in other areas.

National Trends

The national economy turned in a strong performance in 1984. High-level growth was the rule, and this was combined with low inflation and declining unemployment. Nevertheless, the persistence of record Federal budget deficits, coupled with an unprecedented foreign trade deficit, continued to cloud the future. The strength of the U.S. dollar represented a severe handicap to the ability of domestic businesses to export their goods and services and compete with imports, causing an estimated loss of close to two million potential jobs. Although the national unemployment rate of 7.5 percent in 1984 was a sizable drop from the 9.6 percent recorded in 1983, it still reflected a high level of joblessness for a period of strong economic expansion.

Gross National Product posted an impressive advance, particularly in the first half of 1984. For the year, GNP rose to $3,774.7 billion, a gain in real output of 6.5 percent from 1983 and the best annual rate of growth since 1951. Personal income in the United States totaled $3,020.3 billion in 1984, an increase of 10.4 percent from a year earlier. With the inflation rate at 4.3 percent, this represented a substantial gain in real purchasing power.

State Business Activity Moves Ahead on Broad Front

Economic activity in New York State was on the rise in 1984, reaching a series of record levels over the course of the year. The Index of Business Activity averaged 126 (1967 = 100), an increase of five points from the preceding year. Even better performances were posted by wholesale trade, retail trade, factory output and construction, while gains in finance-insurance-real estate and services were more moderate. The only sector losing ground was transportation-communications-public utilities.

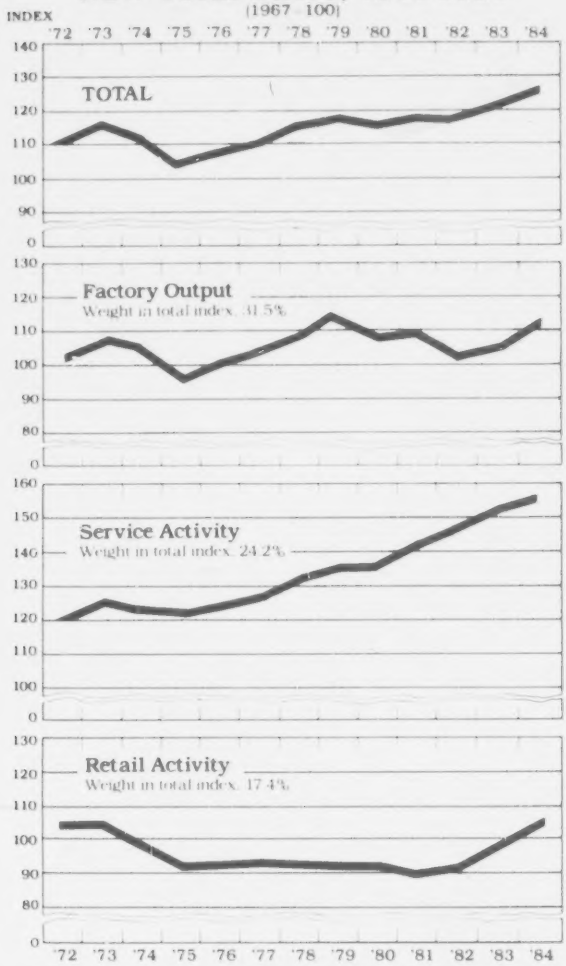
Personal Income Up Sharply

According to the U.S. Department of Commerce, total personal income in New York State grew from $231.1 billion in 1983 to $253.9 billion in 1984. This 9.9 percent gain was relatively close to the 10.4 percent increase for the country as a whole. On a per-capita basis, the State's rate of growth from 1983 to 1984 was 9.5 percent, slightly above the United States advance of 9.4 percent. Per-capita income rose from $13,081 to $14,318 in New York State, compared with a nationwide advance from $11,690 to $12,789. New York ranked seventh among the 50 states in per-capita income.

Employment Climbs, Unemployment Drops

Nonfarm wage and salary employment in the State averaged 7,557,000 in 1984, an increase of 243,700 from 1983. Every month exceeded the year-earlier level by a wide margin. All industry sectors participated in the advance, led by services (+85,100) and retail trade (+50,700). Additional sizable advances occurred in manufacturing (+27,800), construction (+21,000), government (+17,700) and finance-insurance-real estate (+16,800).

INDEX OF BUSINESS ACTIVITY and its Major Components[1] NEW YORK STATE, 1972-1984



[1]Components not charted here, and their weights, include: Transportation, Communications, Public Utilities Activity (8.6%); Finance, Insurance and Real Estate Activity (7.6%); Construction Activity (5.5%); and Wholesale Activity (5.2%).

Unemployment posted a hefty 15-percent drop in 1984, averaging out at 584,000. The unemployment rate for the year declined to 7.2 percent from the 8.6-percent level recorded in 1983. Nationally, the jobless rate fell to 7.5 percent from 9.6 percent.

Area Economic Conditions—Wide-Ranging Gains

All 13 area business activity indexes showed year-to-year improvement, most in the robust category. Heading the list were the Nassau-Suffolk (+13 points), Poughkeepsie (+12) and Orange County (+11) areas, closely followed by Binghamton and Glens Falls (+10 each), Rochester, Syracuse and Westchester-Rockland-Putnam (+9 each) and Albany-Schenectady-Troy and Utica-Rome (+8 each). Rounding out the list were Buffalo-Niagara Falls and Elmira (+5 each) and New York City (+2).

Job levels were up in all areas, with three fifths of the statewide increase occurring Downstate—the eight-county New York City Area was up 97,000 and Nassau-Suffolk rose 51,900. Among the upstate areas the largest increases were reported in the Albany-Schenectady-Troy (+16,900), Rochester (+15,800), Buffalo-Niagara Falls (+14,600) and Syracuse (+12,400) areas.

Manufacturing-Production Gains Outpace Employment Recovery

Manufacturing activity advanced moderately over the year, matching a record high in both July and December. The factory output index averaged 112 in 1984, a seven-point increase from 1983.

Factory employment averaged 1,330,200 in 1984, an increase of 27,800 jobs from 1983. Nevertheless, this was only a small proportion of the over 100,000 jobs that were lost in the recent recession. Gains from 1983 were much more concentrated in durable-goods industries than in nondurables, +21,700 and +6,100, respectively. In the durables group, large increases were posted in electrical machinery (+9,000), transportation equipment (+4,800) and fabricated metals

(+3,000). Only mildly countering these gains were declines in primary metals (−1,300) and instruments (−600). In nondurables, the best performers were printing and publishing (+3,900), rubber and plastic products (+2,200) and textiles (+2,000), with leather products (−1,600) and apparel (−1,100) the chief offsetting factors.

The average weekly earnings of manufacturing production workers employed in New York State advanced from $347.41 in 1983 to $366.96 in 1984, a 5.6-percent advance, or approximately 1.3 percentage points more than the rate of inflation. The average factory workweek climbed to 39.8 hours from the 39.3 hours recorded in 1983.

New Plants

Many new manufacturing plants and expansions in New York State were announced in 1984. Among these were the following:

Bausch & Lomb, Inc., a leading producer of eyeglasses and contact lenses, has begun a multi-year expansion which will create 200 new jobs at its various Rochester (Monroe County) locations. Phase I of the project will cost $15 million, and will include a plant expansion and new equipment.

Bush Industries, Inc. is constructing a $13.1-million branch plant in Falconer (Chautauqua County) to expand its production of wood furniture. Scheduled for 1985 completion, the 376,000-square-foot plant will create up to 500 new jobs.

Chemical Process & Supply Corp. is completing a new 172,000-square-foot commercial printing ink plant in Sheridan (Chautauqua County). The $16.5-million project includes $13 million for new machinery and equipment, and should create 250 new jobs. Chemical Process & Supply is a subsidiary of Greater Buffalo Press, Inc.

Dunlop Tire & Rubber Corp., in Buffalo (Erie County), is installing a new production line for radial truck tires. Expected investment is $15 million.

Charles Freihofer Baking Co., Inc. is constructing a new $10-million danish and sweet goods plant in Albany (Albany County). The 86,000-square-foot facility will replace an existing plant and house $6 million worth of new equipment. Completion is scheduled for late 1985, with no new jobs anticipated.

General Electric Company is spending $86 million at its Noryl Products Plastics Division facility at Selkirk (Albany County). The long-range project will add to the plant's production, finishing and compounding capacity. About 20 new jobs will be created.

Gibralter Steel Corp. is completing a $10-million expansion at its Seneca Steel Div. plant in Buffalo (Erie County) which should create up to 150 new jobs by early 1985.

Mademoiselle Knitwear, Inc. will expand its knit outerwear operations in Brooklyn (Kings County) by constructing a new $15-million plant. When completed by spring, 1987, production space will be increased by 145,000 square feet and from 500 to 700 new jobs will be created.

Materials Research Corp. is building a new $10-million plant in Clarkstown (Rockland County) which will add 150,000 square feet of space to its operations, producing scientific instrumentation. About 130 new jobs are anticipated when the project is completed in late 1985.

Micromos, Inc., a Santa Clara, California-based producer of computer chips, will construct a $28-million, 57,000-square-foot manufacturing plant and R&D facility in Brighton (Monroe County). The company expects to hire 500 in the first two years, and as many as 1,500 within five years.

National Graphics, Inc., a newly-organized commercial printing firm, is constructing a $19.5-million printing plant and corporate offices in DeWitt (Onondaga County). Total operating space will be 98,500

square feet and 150 jobs will be created by mid-1985.

- Pepsi-Cola Bottling Co. of New York, Inc. is relocating within Queens County, from Long Island City to the College Point Corporate Park. A new 375,000-square-foot facility is being constructed and about 165 new jobs will be created. Total project cost is estimated at $42 million.
- Quad/Graphics, Inc. opened a 110,000-square-foot magazine printing plant in Saratoga Springs (Saratoga County). The Pewaukee, Wisconsin-based firm employs 70 at the $18-million facility. An 80,000 square-foot addition was approved in December which will create another 40 to 100 jobs, with a further investment of $15 million.
- Henry Schein & Co. completed a branch generic drugs and pharmaceuticals plant in Carmel (Putnam County), in late 1984. The $10-million, 120,000-square-foot facility brought 50 new area jobs.
- Xerox Corp. is constructing a $32-million addition to its manufacturing facilities in Webster (Monroe County) to produce toner and dry ink for its copying machines. About 40 new jobs will be created and 30,000 square feet of space will be added.

Construction Turns In Strong Performance

Although still at a very depressed level, the index of construction activity jumped six points to 59 (1967 = 100). Coming on the heels of a similar advance in 1983, this represented substantial progress for an industry which had contracted so sharply during much of the '70's and early '80's. The employment picture reflected this sector's resurgence, climbing by 21,000 to 251,800, the highest level since 1974.

The value of construction contracts awarded in New York State in 1984 totaled $9.2 billion, an eight-percent increase from 1983; the residential-building category was the pacesetter, with a 16-percent advance. Nonbuilding contracts were up nine percent, while the nonresidential segment advanced only three percent. Upstate, with an 18-percent jump in dollar volume, outperformed the Downstate area which reported a gain of three percent.

According to data from the New York State Division of Housing and Community Renewal, new housing units authorized by building permits in 1984 totaled 44,754, a fifteen-percent increase from 1983.

Trade Sectors Lead Economic Expansion

The two trade sectors were the best performers among all major industry groups in 1984. The wholesale trade activity index jumped ten points over the year to an average of 125 (1967 = 100). Retail trade racked up an impressive eight-point advance to 105 (1967 = 100). Over the course of the year retail activity had its ups and downs, with a particularly robust second quarter, but tapered off thereafter to a relatively steady level for the remainder of the year.

Employment moved higher in both sectors, with retail trade up by 50,700 for the year to 1,102,900. Wholesale jobs grew by 13,700 to an annual average of 464,900.

Strong consumer spending boosted activity in New York's retail stores for the second consecutive year. Retail sales climbed to $90.8 billion in 1984, up 11.5 percent from 1983. Sales growth in New York City, however, did not match the statewide rate, amounting to only 7.5 percent over 1983.

Services Continue to Grow in Importance

The services industries grew conservatively most of the year, but the fourth quarter performance spurred this sector to a strong finish. The service activity index climbed to an average level of 155 (1967 = 100) in 1984, a three-point advance for the year. Employment was up an impressive 85,100 to a total of 1,962,000. This industry now provides jobs for over one quarter of the State's nonfarm workers.

Finance-insurance-real estate activity rose four points to 233 (1967 = 100) in 1984. From its lofty level, this sector continues to

represent a very vital part of the State's economy. Employment was up a hefty 16,800, to an average of 703,500 in 1984.

Despite the high value of the dollar, which continued to impede the growth of foreign travel to New York, the State experienced a significant improvement in tourism activity. Travel and tourism industry employment rose from 605,800 in 1983 to 632,500 in 1984. Visitors to the State spent an estimated $13.6 billion during the year, compared to the 1983 total of $12.5 billion. New York held its number one position as the destination of overseas and Canadian arrivals in the United States, and remained a leader in interstate travel by U.S. residents.

Name of Company	*Project Site and County*	*Nature of Expansion*

1. Includes employment and payroll reported at central administrative offices and auxiliary units.

MANUFACTURES, 1982 and 1977 *Source:* United States Bureau of the Census, Census of Manufactures, 1982 and 1977.

All Employees is an average of production workers who worked in the pay period nearest the mid-month in March, May, August and November plus all other employees in mid-March. *All Employees* and *Payroll* include persons working at central administrative offices and auxiliary units. *Production Workers* include workers up to the foreman level who make, inspect, store and ship the firm's products, or who do work closely associated with these functions, such as plant maintenance, record keeping and product development. It excludes supervisors above the working foreman level, force-account construction workers, salesmen, deliverymen, and advertising, service, installation, credit, cafeteria, professional, technical and administrative workers. Production workers' *Hours* are all those worked or paid for, including actual overtime hours, but excluding hours of paid vacations, holidays, or sick leave, when the employee was not at the plant. *Wages* are the portion of the payroll paid to production workers. *Value Added by Manufacture* is the value of shipments (including resales), adjusted for the net change in inventory of finished goods and work-in-process, less the cost of materials, supplies, containers, fuels, goods purchased for resale and contract work. *Value of Shipments* is the received or receivable net selling values, after discounts and allowances, excluding freight charges and excise taxes. Much duplication occurs in this figure, however, because the products of many establishments are the materials of others. *New Capital Expenditures* include, for plants operating or under construction, expenditures made during the year for new structures and additions (including major alterations, capitalized repairs and improvements), and for new machinery and equipment or capitalized repairs to old, but do not include expenditures for land or "used" plant and equipment, nor expenditures by owners of loft buildings or other leased plant space, nor the value of plant and equipment used by the manufacturer but owned by another organization, including Federal or local governmental agencies.

CONSTRUCTION CONTRACTS *Source:* F.W. Dodge Division, McGraw-Hill Information Systems Company. Proprietary data provided by special permission.

The value of construction contracts includes not only actual awards, but also the value of certain commitments to build, not covered by contract, as in residential developments. The contracts precede actual construction. Included under *Nonresidential Buildings* are such structures as factories, stores, office buildings, banks, schools, service stations, prisons, churches, warehouses, hospitals and airport buildings. *Residential Buildings* include hotels, motels and dormitories as well as one- and two-family houses and apartment buildings. Under *Nonbuilding Structures* are such heavy engineering projects as streets and highways, bridges, sewers, water-supply systems, airports (but not the buildings) and electric light and power systems.

EMPLOYMENT *Source:* New York State Department of Labor

Estimates of employment in nonagricultural establishments are made for the State and the larger labor areas. The industries for which estimates are provided individually are the principal ones in each area. The totals do not include the self-employed, the military, farm workers and the employees of international organizations or private households.

Employment covered by unemployment insurance is less inclusive. It excludes not only the groups omitted from nonagriculture employment, but also workers for employers with less than $300 and those for household workers with less than $500 in payroll for a calendar quarter, and for interstate railroads and government. Data from this source ordinarily become available six to eight months later than the estimates of nonagricultural employment. However, they provide greater detail by industry than is available from the estimates, and give separate figures for each county—those combined in the multi-county industrial areas of the nonagricultural employment estimates as well as the smaller counties outside these areas. For any industry group, data are withheld in any county, metropolitan area or economic area for which the total might disclose information about a single establishment. In any county or area with only one nondisclosable industry, information has been withheld from a second to prevent subtraction of detail from the total to derive a withheld figure. Data in the table *Business Establishments, March 1984* are the reporting units covered by unemployment insurance distributed according to the number of employees per unit. A reporting unit is normally a single place of business, but it may be only part of one when functions in more than one industry, carried on by a firm at one location, are reported as separate units, and it may be several places of business when the branches of a firm, within one county and in the same industry, are reported as one unit.

The classification by industry in both series is that of the 1972 Standard Industrial Classification; employment in central administrative offices, research laboratories and other auxiliary facilities of manufacturing companies is included in the appropriate manufacturing industries; the totals include some duplication because dual job holders are counted twice; and all the figures are as of the place of employment, not the place of the residence.

CIVILIAN LABOR FORCE *Source:* United States Department of Labor; New York State Department of Labor.

Total Employment includes all employees in private and government employment, self-employed persons and unpaid family workers, by place of residence. ***Total Unemployment*** includes all persons who during the mid-week of the month were able to work, were available for work and were seeking work but were without employment during the entire survey week. *Total Labor Force* is the sum of total employment and total unemployment. The *Unemployment Rate* is total unemployment as a percentage of the civilian labor force.

*Data withheld to avoid disclosure.

1. For metropolitan area definitions, see page 23.

NOTE: The New York State totals include employment which was not assigned to any county; totals and subtotals for specific industries include employment withheld for counties or areas, to avoid disclosure. For counties or areas where employment for some industries is withheld, the amount is combined with employment in establishments not classified in a specific industry in the "Other" column.

1. For metropolitan area definitions, see page 23.

METROPOLITAN STATISTICAL AREAS

Area	*Definition*
Albany-Schenectady-Troy	Albany, Greene, Montgomery, Rensselaer, Saratoga and Schenectady counties
Binghamton	Broome and Tioga counties
Buffalo-Niagara Falls	Erie and Niagara counties
Elmira	Chemung County
Glens Falls	Warren and Washington counties
Nassau-Suffolk	Nassau and Suffolk counties
New York	New York City plus Putnam, Rockland and Westchester counties
Orange County	Orange County
Poughkeepsie	Dutchess County
Rochester	Livingston, Monroe, Ontario, Orleans and Wayne counties
Syracuse	Madison, Onondaga and Oswego counties
Utica-Rome	Herkimer and Oneida counties

PERSONAL INCOME Source: United States Department of Commerce.

Total personal income consists of private and government salary payments (both cash and in kind) before deductions for income and other direct personal taxes, but after deductions for social insurance programs. Also included are receipts from other labor income, farm and nonfarm proprietor's income; interest, net rents, dividends and transfer payments.

Per-capita income is obtained by dividing total personal income by population estimates, provided by the U.S. Bureau of the Census.

Research bulletins, which contain detailed information on personal income, are prepared annually by the New York State Department of Commerce.

MISCELLANEOUS *Sources:* New York State Department of Education; Federal Deposit Insurance Corporation, *Data Book, Operating Banks and Branches, June 30, 1984*, New York State Department of Motor Vehicles.

High School Graduates, 1984 are all public, parochial and other private school pupils receiving diplomas during that school year. This includes those who received a diploma after attending evening or summer sessions, and those who graduated in February, as well as regular June graduates. Also included in the total are 44,337 persons who passed high school equivalency tests. *Bank Deposits, June 30, 1984* include *Demand* deposits of individuals, partnerships and corporations in all commercial banks and *Time* deposits, which include savings and other time deposits of these groups in commercial banks plus savings deposits in all savings banks; governmental and interbank deposits are included in these totals. Deposits of branch banks are included in the county of the branch. The New York State total *Motor Vehicle Registrations, 1984* is larger than the sum of the county figures because it includes vehicles owned by out-of-state residents; county and area totals have been adjusted to a by-resident basis. *Commercial* motor vehicles are trucks only. *Other* motor vehicles include buses, taxis, ambulances, trailers, farm vehicles, mopeds, rental cars and motorcycles. The total is based on when registration fees were paid, rather than on when they were due. The distributions between *Commercial* and *Other* are partially estimated.
